

We started our topic discussing what we knew about the different seasons. WE knew lots already. We explored our school for signs of Autumn. We found many things, even a pumpkin! In literacy we read the book Tree and created fantastic artwork.

We are so creative! We made huge weather symbols for our outdoor area.

To show our understanding of the seasons we sorted examples of each season independently

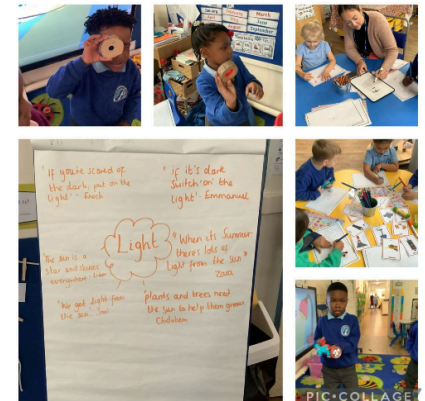

All Systems GO!

Finally in our journey we explored electricity, the children hunted around our classroom to find examples of electrical items. We discussed why we need electricity and the children were able to sort electrical and non electrical items.

Next we explored light and how it helps us to see. We read the story of Owl babies, we explored torches and learnt all about sources of light

If you're scared of the dark, put on the Light! Torch
 The sun is a star and shines for everyone that we get light from the sun!
 Light
 When it's dark there's lots of light from the sun!
 If it's dark Switch on the Light! Enormous
 Plants and trees need the sun to help them grow! Children
